

incraftables™

indian agate beads

PRODUCT INSTRUCTIONS

The **Incraftables Indian Agate Beads** set includes 20 high-quality, natural Indian Agate beads, each measuring 12mm in diameter. These beads are ideal for various jewelry-making and crafting projects, whether for bracelets, necklaces, earrings, or mixed media designs. Each bead has a 6mm hole, making them versatile for a range of stringing materials.

WHAT'S INCLUDED:

- **20 Indian Agate Beads** (12mm in size, with 6mm hole size)

TOOLS NEEDED:

- Jewelry-making wire, cord, or elastic that is 6mm or smaller in diameter to fit the bead holes
- Jewelry pliers or cutters, depending on the stringing material used
- Beading mat or tray to keep beads in place
- Optional: Jewelry glue (for securing knots)

STEP-BY-STEP INSTRUCTIONS:

1. Design Your Layout

- Decide on the pattern and layout for your beads, especially if you're combining them with other beads.

2. Stringing the Beads

- Select your preferred stringing material. Ensure it's no thicker than 6mm to pass through each bead hole easily.

STEP-BY-STEP INSTRUCTIONS:

3. Securing the Ends

- Once all beads are on the string, tie a knot, or secure with a clasp if making a necklace or bracelet. Apply a dab of jewelry glue on the knot for added durability if using elastic.

4. Finishing Touches

- Trim any excess stringing material to finish your piece neatly.

TIPS FOR BEST RESULTS:

- **Plan Your Design:** Lay out your design on a bead board or mat to visualize your pattern before stringing.
- **Use a Needle:** For thin cord materials, consider using a beading needle for easier threading.
- **Sturdy Material:** For heavier pieces, like necklaces, consider using a wire or sturdy cord to hold the weight of the 12mm beads securely.
- **Knot Between Beads:** If you're making a bracelet or necklace, knotting between each bead can add durability and style.
