incraftables™

pearl
beads

PRODUCT INSTRUCTIONS

The **Incraftables Pearl Beads Kit** is an all-in-one crafting solution for creating stunning jewelry pieces. With a total of 1,700 multicolored, round pearl beads, this kit is designed for both beginners and experienced crafters alike. Each bead measures 6mm, making them perfect for necklaces, bracelets, earrings, and other decorative items.

WHAT'S INCLUDED:

- **Pearl Beads:** 1,700 pieces in a total of 24 vibrant colors
- **Elastic Thread:** 1 spool for easy stringing of beads
- **Silver Wire:** 1 spool for creating intricate designs
- **Clasps:** 15 pieces to secure your creations
- **Jump Rings:** 15 pieces for connecting beads and components

TOOLS NEEDED:

- **Scissors** (for cutting thread and wire)
- **Jewelry pliers** (for working with clasps and jump rings)
- **Beading mat** (to keep your beads organized and prevent rolling)
- **Ruler or measuring tape** (for precise lengths of elastic or wire)

STEP-BY-STEP INSTRUCTIONS:

1. Designing Your Creation

- **Plan Your Design:** Decide on the type of jewelry you want to create (bracelet, necklace, or earrings) and sketch a simple design.
- **Color Combination:** Choose a combination of pearl beads from the available colors.

STEP-BY-STEP INSTRUCTIONS:

2. Creating a Beaded Bracelet with Elastic Thread

- Measure Your Wrist: Determine the length of elastic thread needed (usually around 2 inches longer than your wrist size).
- Cut the Elastic Thread: Use scissors to cut the elastic thread to the measured length.
- String the Beads: Begin stringing the beads onto the elastic thread in your desired pattern.
- Secure the Ends: Once you've added all the beads, tie the ends of the elastic thread in a secure knot (double knot recommended). You can add a drop of clear nail polish or glue to secure the knot if desired.
- Attach a Clasp: If you want a removable clasp, thread the ends of the elastic through the clasp and tie a knot to secure it.

STEP-BY-STEP INSTRUCTIONS:

3. Making Designs with Silver Wire

- **Cut the Wire:** Cut a piece of silver wire to your desired length, leaving extra for looping.
- **String the Beads:** Slide the beads onto the wire in your chosen pattern.
- **Creating Loops:** Use round-nose pliers to bend the wire at the ends to create loops, securing the beads in place.
- **Adding Jump Rings:** If desired, use jump rings to attach components or add additional beads.
- **Secure with Clasps:** Attach clasps to the ends by looping the wire through and twisting to secure.

STEP-BY-STEP INSTRUCTIONS:

4. Connecting Components with Jump Rings

- Use Jump Rings: Open a jump ring using pliers, slide it through the desired components, and then close it securely.
- Creating Dangles: You can create dangles or charm effects by attaching beads to jump rings.

TIPS FOR BEST RESULTS:

- **Color Coordination:** Play with different colors and sizes of beads to find combinations that appeal to you.

- **Knotting Technique:** When knotting elastic thread, ensure the knot is tight and that the beads can slide without loosening the knot.

- **Wire Work Practice:** If you're new to using wire, practice making loops and curls on scrap pieces before working on your actual design.

- **Design Stability:** If your design is heavy or intricate, consider using crimp beads along with wire for added stability.

- **Storage:** Keep your beads organized in containers or trays to easily access and sort colors as you work.
