PRODUCT INSTRUCTIONS

Supplies you'll need:

- Soft clay for baking
- Sculpting tools
- Keychain
- Ring Holder
- Hairpin
- Jewelry Hanging Ropes
- Multicolor Beads
- Brooch Holder
- Earring Hooks

how to make crafts or various sculptures using

POLYMER CLAY KIT

1. Prepare your workspace:

- Cover your work surface with parchment paper or a silicone baking mat to prevent the clay from sticking to it.

2. Select your colors:

- Choose the colors you want to work with. Our Polymer clay comes in 24 colors, and you can also mix them to create custom shades.

3. Knead the clay:

- Take a piece of polymer clay and knead it in your hands to warm it up and make it pliable. This helps remove any air bubbles and makes the clay easier to work with. Knead each color separately.

4. Start sculpting:

- Use your sculpting tools to shape the clay. You can create various shapes, figures, or jewelry pieces. Be creative and have fun experimenting with different techniques.

5. Baking:

- Follow the instructions on the polymer clay kit for baking times and temperatures. Typically, you'll need to preheat your household oven to the specified temperature (usually around 275°F or 130°C) and place your clay creations on a baking sheet lined with parchment paper. Bake for the recommended time, which is usually around 15-30 minutes per 1/4 inch (6mm) of thickness.

6. Cooling:

- Allow your clay creations to cool completely after baking. They will become hard and durable once cooled.

7. Enjoy your creations:

- Once your polymer clay creations are complete and dry, you can use them as decorations, jewelry, figurines, or any other purpose you had in mind.

always follow the specific instructions provided with your POLYMER CLAY KIT, as different brands may have slightly different requirements for baking times and temperatures. additionally, be cautious when using ovens and sharp sculpting tools, and make sure to work in a well-ventilated area.
