### 1. Plan Your Design

- Sketch out your design or decide on a color pattern. Use the alphabet and spacer beads to add personalized touches.

### 2. Cut the Elastic String

- Measure the string around your wrist or neck, leaving a little extra length for tying knots.

## STEP-BY-STEP INSTRUCTIONS:

### 3. String the Beads

- Begin by threading the beads onto the elastic string according to your design. Use colored spacer beads between pony beads or add letter beads for personalization.

### 4. Secure the Ends

- For Bracelets/Necklaces: Tie a double knot with the elastic. For added security, add a dab of glue before trimming the ends.
- Using Clasps: Thread a jump ring onto each end of the elastic, attach the clasp to one end, and secure with a knot.

## STEP-BY-STEP INSTRUCTIONS:

### 5. Make Keychains

- String beads onto the elastic or thread of choice, then loop the end through a keychain ring. Knot securely and trim excess.
