# rondelle spacer beads

PRODUCT INSTRUCTIONS

**The Incraftables Rondelle Beads Kit** is perfect for jewelry-making enthusiasts of all skill levels. This kit includes a variety of rondelle beads in three different sizes, elastic string, silver wire, clasps, and jump rings—all organized in a convenient storage box. Create stunning bracelets, necklaces, and earrings with ease!

## WHAT'S INCLUDED:

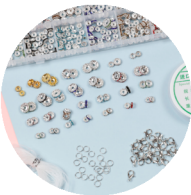

- Rondelle Beads (Total: 800 pcs)
  - 6mm (Count: 400 pcs)
  - 8mm (Count: 200 pcs)
  - 10mm (Count: 200 pcs)
- Elastic String (Count: 33 ft)
- Silver Wire (Count: 1 spool)
- Clasps (Count: 15 pcs)
- Jump Rings (Count: 15 pcs)
- Organizer Box (Count: 1 pc)

## TOOLS NEEDED:

- Wire cutters (for cutting wire and string)
- Needle-nose pliers (for bending wire and opening/closing jump rings)
- Scissors (for cutting elastic string)
- Ruler or measuring tape (for measuring string length)
- Beading mat or tray (optional, for keeping beads organized while working)

## STEP-BY-STEP INSTRUCTIONS:

### 1. Design Your Jewelry

- Plan the design of your piece by laying out the beads in the desired pattern.

### 2. Cut the String or Wire

- Measure and cut an appropriate length of elastic string or silver wire. For bracelets, aim for about 7-8 inches, plus extra for tying knots.

## STEP-BY-STEP INSTRUCTIONS:

### 3. String the Beads

- For elastic string: Simply thread the beads onto the string, ensuring you leave enough length at both ends for tying.
- For silver wire: Use the needle-nose pliers to create loops on either end of your wire for attaching clasps and jump rings.

### 4. Secure the Ends

- For elastic string: Tie a double knot to secure the beads, trimming any excess string.
- For silver wire: Attach clasps and jump rings using pliers to ensure a secure closure.

## STEP-BY-STEP INSTRUCTIONS:

### 5. Final Touches

- Check your jewelry piece for any loose beads or knots, and make adjustments as needed.

## TIPS FOR BEST RESULTS:

- **Bead Arrangement:** Experiment with color combinations and sizes to create unique designs.
- **Pre-stretch Elastic String:** Gently stretch the elastic string before use to reduce the risk of your finished piece sagging over time.
- **Use a Beading Mat:** This will help keep your beads from rolling away and make it easier to see your design.
- **Secure Knots:** If using elastic, consider adding a drop of jewelry glue on the knots for extra security.
- **Practice with Wire:** If you're new to using wire, practice bending and cutting it before starting your project to gain confidence.
- **Store Properly:** After use, keep your beads organized in the provided box to prevent loss and tangling.
